

IRevolution:A Data-driven Exploration of Apple's iphone Impact in India

Project Submitted BY:

U.Logeshwari

A.Logeswari

K.Maluthi

N.Nandhini

Introduction:

The world has changed as a consequence of the increasing use of smartphones, which have improved communication, connected people, and revolutioned many different businesses. With its main product, the iPhone, capturing markets around the world, Apple Inc. has emerged as a prominent player among the top smartphone makers. India, one of the economies with the greatest economic growth, has seen a tremendous increase in smartphone usage, making it an interesting market to study the effects of Apple's iPhone.

In order to shed light on important factors like market penetration, customer preferences, economic ramifications, and societal changes, this research report will perform a data-driven investigation of the impact of the iPhone in India. This study will offer invaluable insights into the transformative impact of the iPhone on India's technological landscape and the lives of its consumers by using advanced data analytics techniques and analyzing large datasets.

Apple has a special chance to increase its market share and develop a significant presence in India thanks to the country's large population and rising smartphone adoption. Each new iPhone model unveiling generates excitement and anticipation among Indian's buyers. By utilizing the plethora of information. Already accessible, this research aims to go beyond conjecture and anecdotal evidence in order to develop a thorough knowledge of the effects of the iPhone.

Milestone 1: Define Problem/ Problem Understanding

Activity 1: Specify the Business Problem

The objective of this study is to obtain a thorough understanding of how Apple's iPhone would affect the Indian market. In particular, we want to investigate the market penetration of iPhones in India, comprehend consumer preferences and decision-making processes, and assess the social and economic effect of iPhone adoption. We aim to offer insights that can direct designs for Apple and other stakeholders active in the Indian smartphone industry by leveraging data analytics and visualizations using Tableau.

Activity 2: Business requirements

The project's business needs call for data analysis and visualization in order to understand how Apple's iPhone affected India.

Activity:3 Literature survey

The literature survey would involve a search for relevant publications, articles, and academic papers on the topic, as well as analysis of the various research.

Activity:4 Social and business impact

Social impact:

An important component of this study is the societal impact of Apple's iPhone in India.

Business Impact:

Research must focus on how Apple's iPhone has affected business in India. We seek to examine the economic effects of iPhone uptake in the Indian market using data analytics and Tableau visualisations.

Milestone: 2 Data collection and preparation:

Data collection is the process of gathering and measuring information on variables of interest in a fashion that enables one to answer stated research questions, test hypotheses, and evaluate outcomes and generate insights from the data.

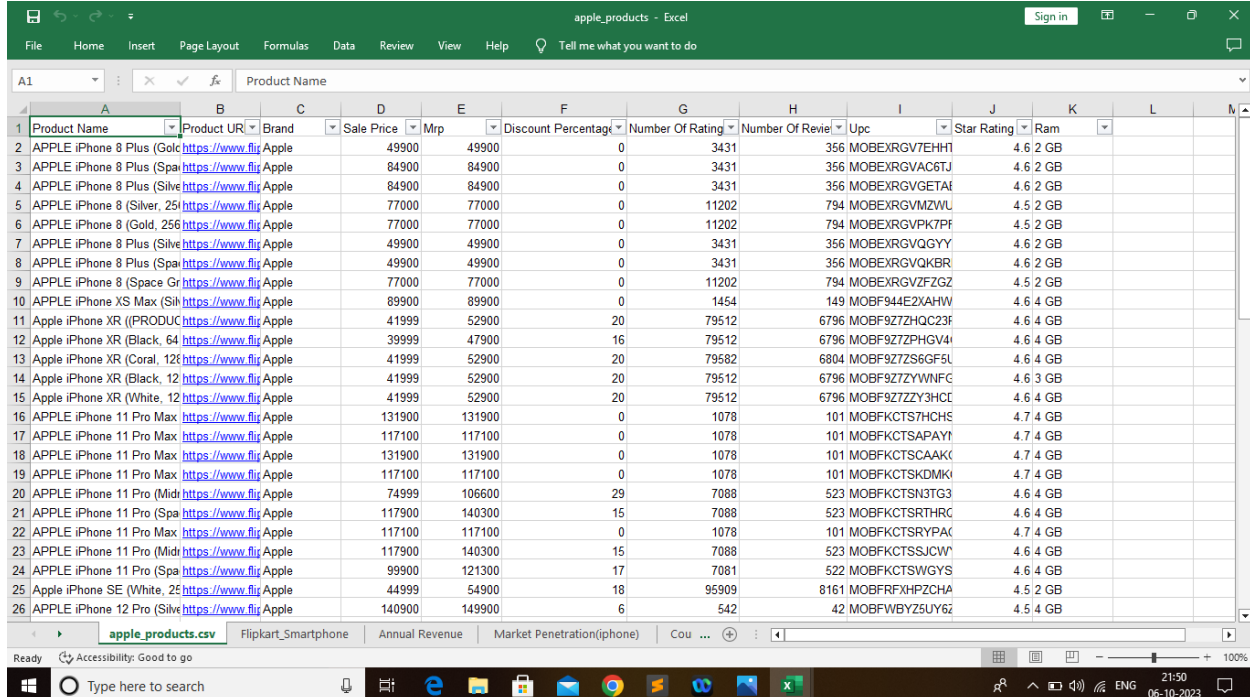

Activity :1 Collect the data set

Activity1.1: Understand the data

Data contains all the meta information regarding the columns described in the CSV files. We have provided the XLSX file.

Column description for Big ml dataset CSV:

Activity 2: Connect datasets with tableau

The screenshot shows the Tableau Public interface. An 'Open' dialog box is open, displaying the file 'apple_products' in the 'Excel Workbooks (*.xls *.xlsx *.xl*)' format. The background shows a Tableau dashboard with a 'Measure Names' list on the right, including 'Count of apple_pr...', 'Discount Percent...', 'Mrp', 'Number Of Ratings', 'Number Of Reviews', 'Sale Price', and 'Star Rating'. The dashboard also shows a 'Data Source' section with 'KPI', 'model specification', 'Battery type', 'Brand Price Comparison', 'Model Share', 'Country wise best selling...', 'Quarterly-share', 'Annual Revenue', 'GMS', 'KPI_2', and 'Dashboard 1'. The status bar at the bottom indicates '4 marks', '1 row by 4 columns', and 'SUM of Measure Values: 154.005'.

Milestone 3: Data preparation

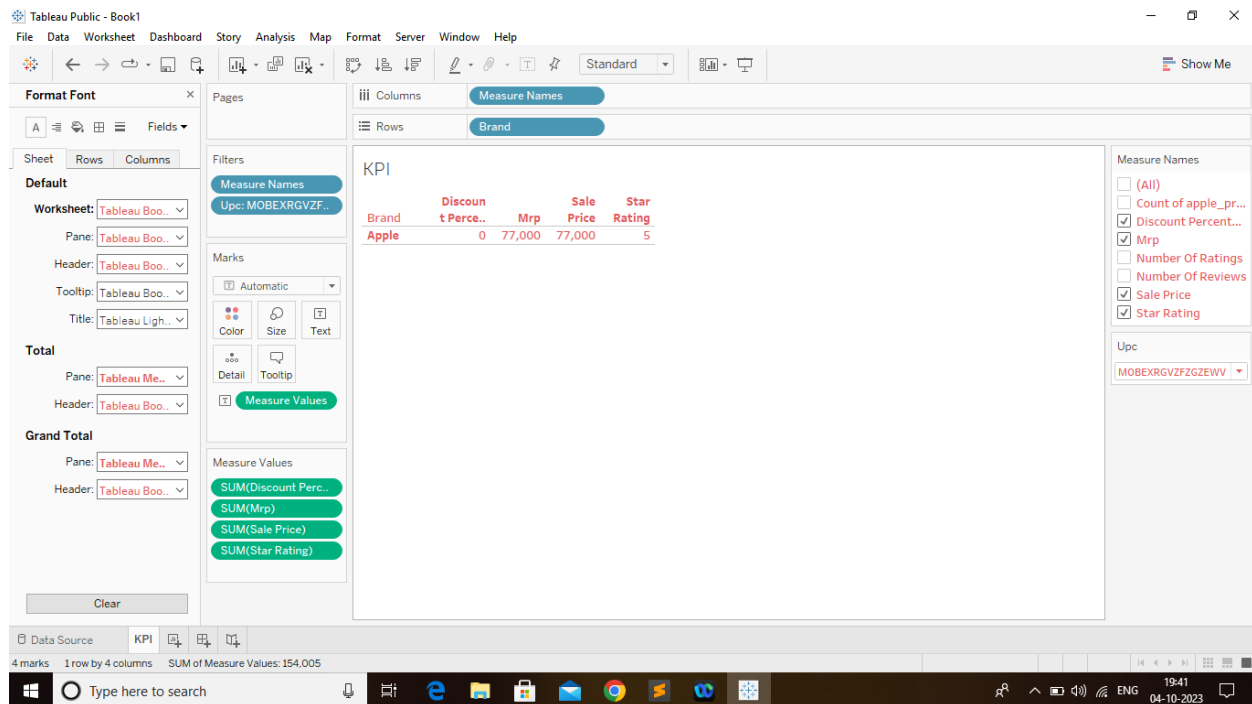

Activity 1: prepare the data for visualization

Data and rules for combining and shaping data to prepare it for analysis and visualization in tableau. Data module sources data module can be based on data servers, packages, uploaded files, data sets, and other data modules

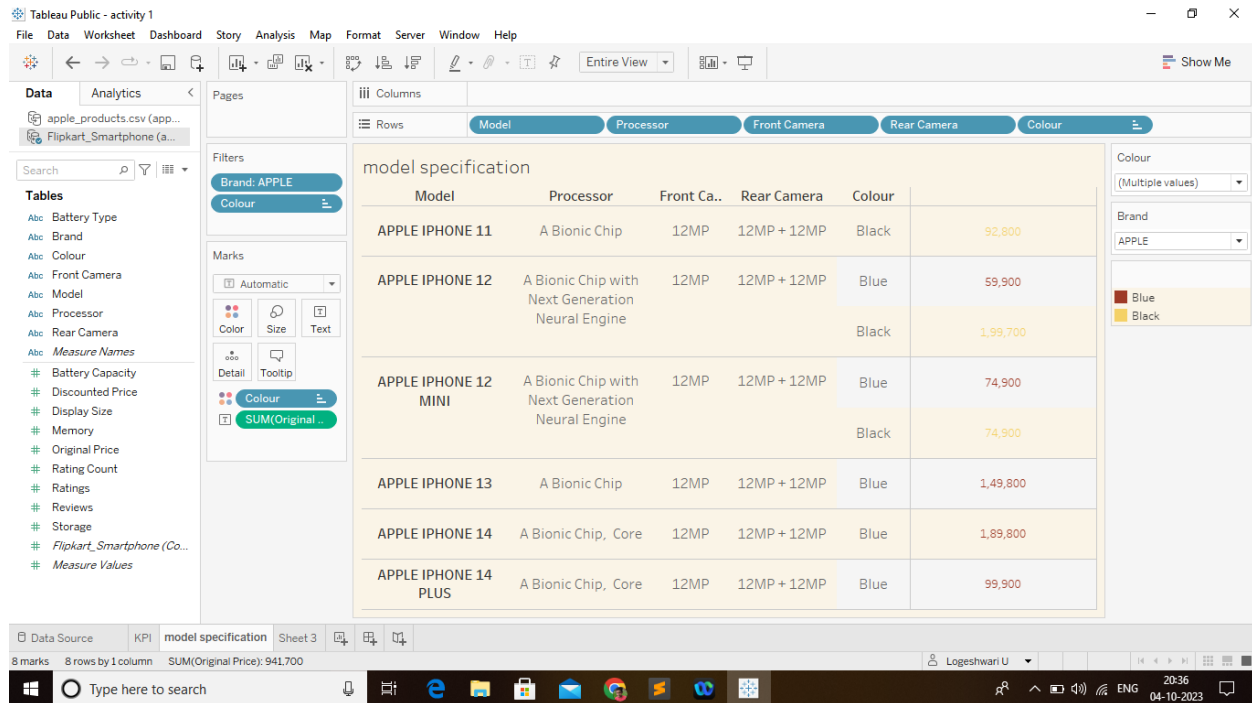

Milestone:4 Data visualization:

Activity 1: No of unique visualisations

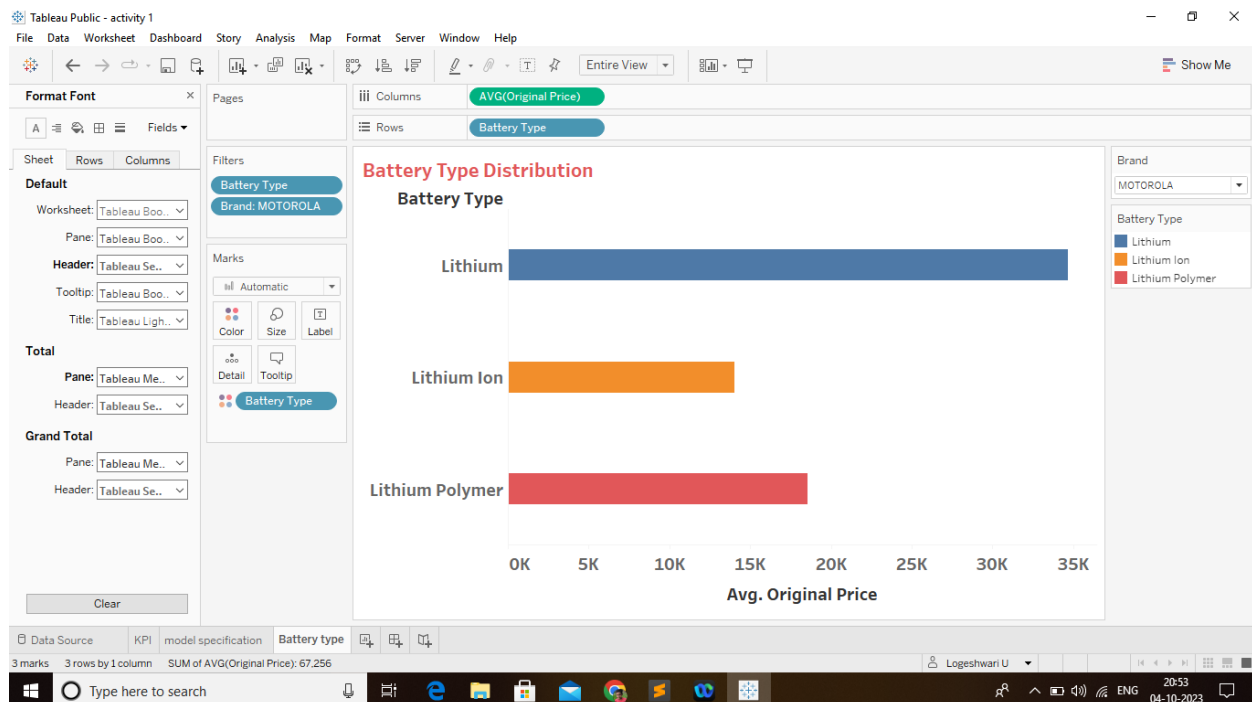

Activity1.1: KPI

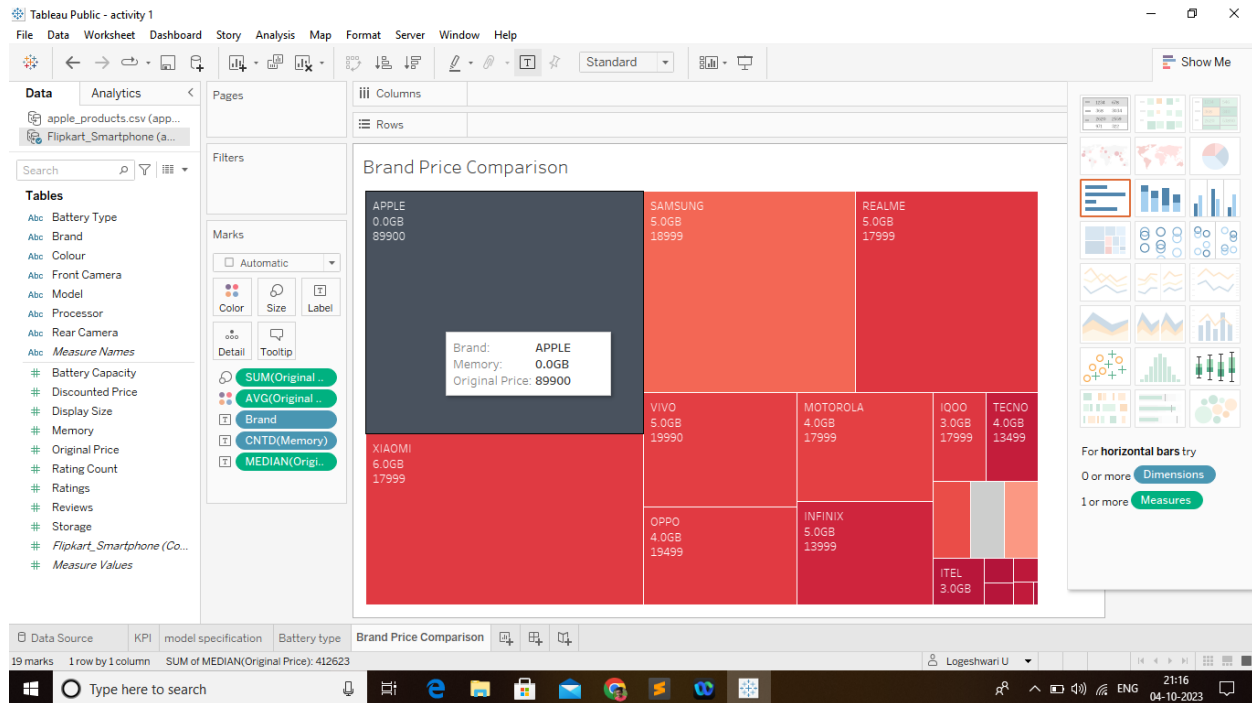

Activity 1.2: Model specification

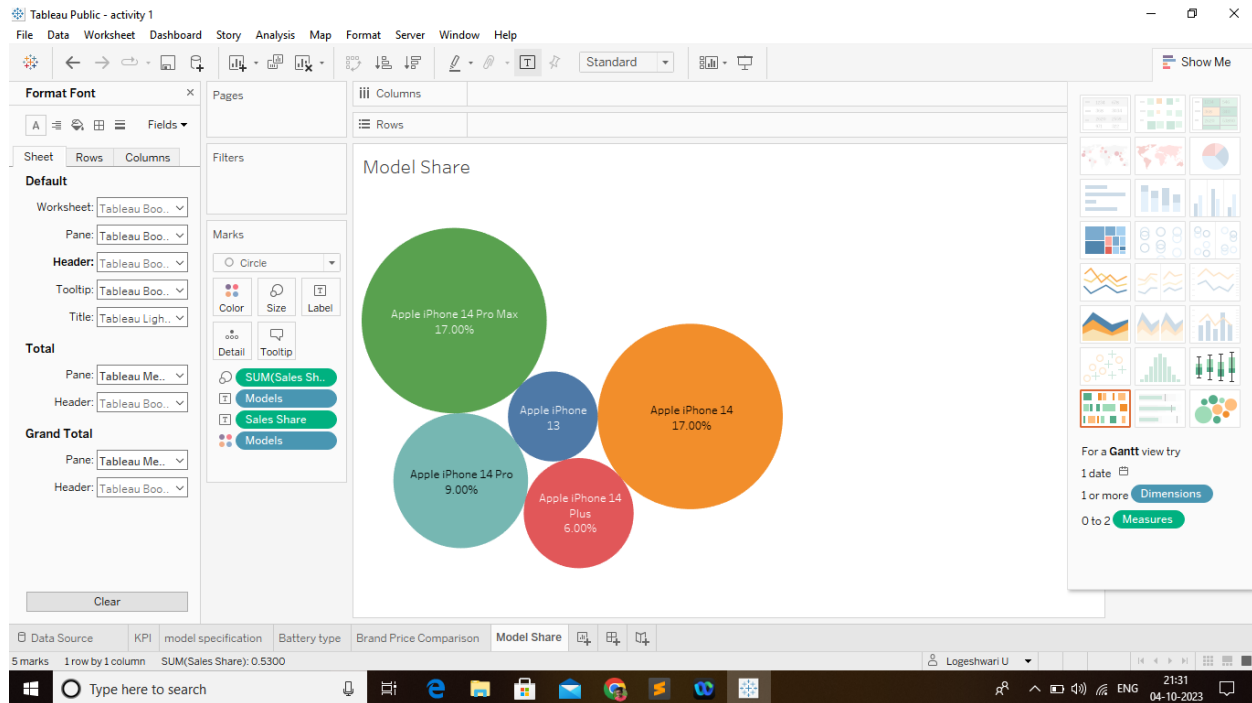

Activity 1.3: Bar chart showing battery-type disrribution

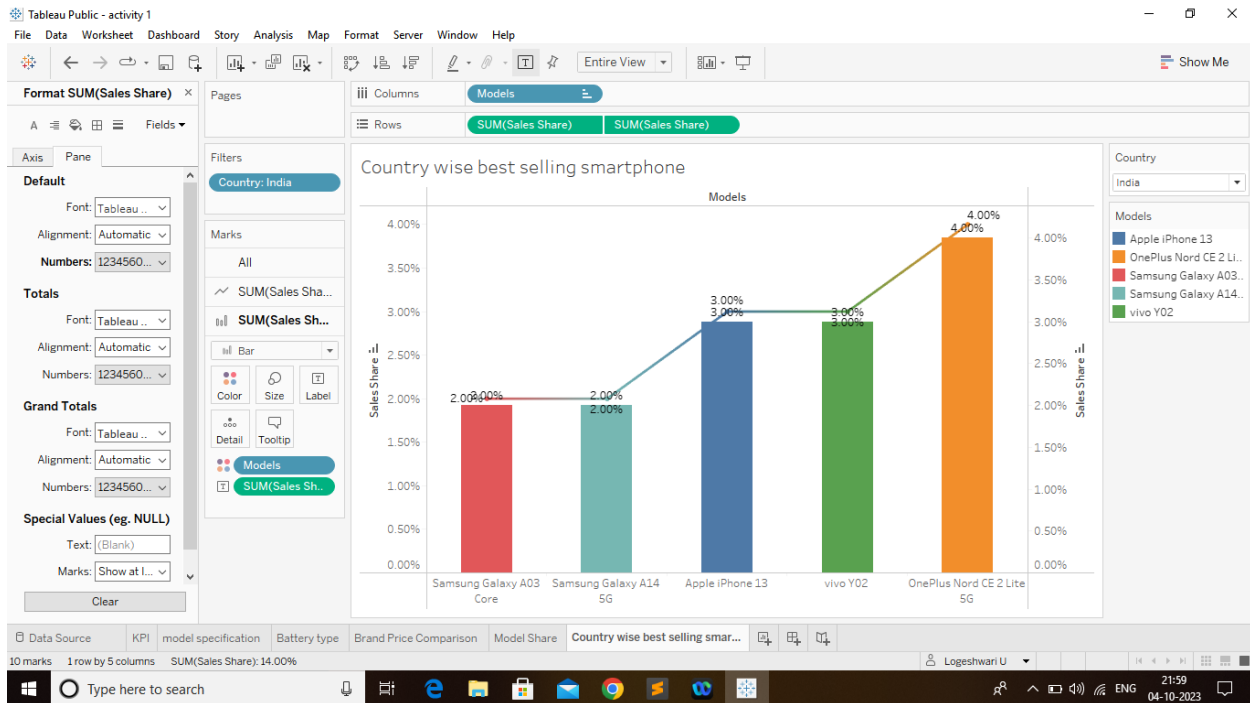

Activity 1.4: Treemap showing brand-price comparison

Logeshwari U 21:15 06-10-2023

Step:2 GO to Dashboard/story, click on share button on the top ribbon

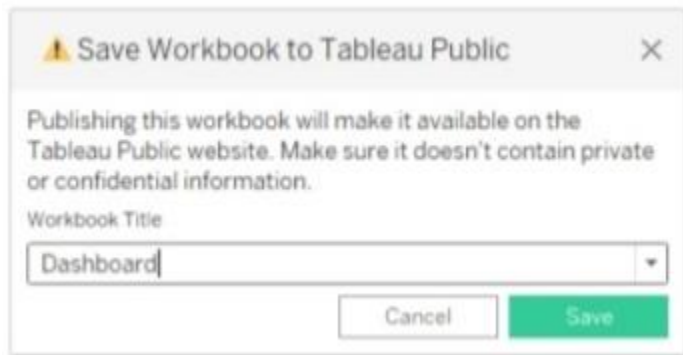

Give the server address of your tableau account and click on connect.

Sign in to your tableau public account or create a new account if you don't have one. You can visit the tableau public website and click on the "sign in" or "join" button.

In the “tableau public sign in” window, enter your tableau public account credentials and click “sign in”.

Next, you’ll need to provide a title and description for your workbook. Fill in the appropriate details in the provided field of workbook title.

Click on the “save” button to start the publishing process. Tableau Desktop will upload your workbook to tableau public.

Once the upload is complete, a browser will automatically open, displaying your published workbook on tableau public. Review the workbook to ensure that everything appears as expected.

Advantages and Disadvantages:

Advantages:

- Fast processors for better performance
- Apple blends hardware and software well
- Apple has always been the clear winner
- User friendly interface
- High quality display

Disadvantages:

- Cost
- Non removable battery
- Limited customisation
- Frailty
- No Expandable Storage

Conclusion:

In this project we analysis iphone users in india in year on year.
